

Testimonial Leadership for Women

The Leadership for Women's Course is an ingenious way for women from all areas of the workforce to ban together to discover their full potential as executives, business owners, and managers and most importantly as women and their fulfilling role as mother, daughter, sister, friend and spouse.

This course covers such important areas. This course motivates and instills the corporate rules into values that we as women hold very important in our daily lives. We were taught goal settings and the importance of following through. This enforces our personal leadership and positive self-image.

I felt that I have discovered yet another layer of who I am and what more I can become. I have bonded with the women in the class and feel that I have secured a strong network of masterminds where I can brainstorm for future situations and ideas.

My overall business goals set with my Manager at the beginning of the program, resulted in \$750,000 in revenue and savings combined for the Company in just the 8 short months of this process.

I have learned that communication, patience and leadership are the strongest qualities to becoming a successful businesswoman in today's corporate world.

Thank you for allowing me to be part of this marvelous experience. I have grown both personally and professionally and have a renewed sense of excitement to take on all obstacles.

Thank you,

Anna Ottaviani

Office/HR Manager
